# ENV. PERMIT WAIVER

**A pre-construction meeting with an Environmental Inspector and a Building Permit will be required in order to proceed with construction on the site. The project shall comply with sediment and erosion controls and tree protection as detailed in the City of Tallahassee Land Development Code. If disturbance is within existing paved vehicular use area, prior to completion, the contractor will be required to repave the vehicular use area disturbed.**

Upon review of the above, it has been determined that the proposed activity does not require an environmental management permit. This activity is not exempt from other applicable provisions of Chapter 5, Environmental Management, of the Tallahassee Land Development Code, such as but without limitation, those pertaining to tree protection and the control of pollution during construction. Failure to comply with these requirements shall constitute a violation of the Environmental Management Ordinance.
