Coordinates and expedites the development of stormwater management and other major City capital projects with the public, City departments, county, state, and federal agencies. Develops capital improvement projects and Project Development and Environmental (PD&E) Study reports with multi-disciplinary input from the public, City departments, other agencies, consultants, and others affected by the project. Develops and administers a citizen participation/public input process for capital improvement project and keeps the community advised and informed about the Capital Improvement Program and the progress of specific projects through various means, including news releases, information letters, speaking engagements, etc. Contracts with and manages Capital Improvement Program Design Consultants or City staff to prepare the required documents for PD&E reports. Coordinates City staff or consultants for development of the project final design from the PD&E report. Educates internal and external customers on capital improvement project design concepts, environmental assessments, and other aspects of project development, design, and construction. Recommends the hiring, promoting, transferring, or demoting of subordinate personnel. Conducts performance evaluations and recommends approval or disapproval of merit increases. Performs related work as required.

**Other Important Duties**

- Attends and represents management at staff meetings, conferences, seminars, workshops, public hearings, and other functions as required. Prepares drafts of proposals and makes reports on completed assignments. Represents the Stormwater Division at staff meetings, conferences, seminars, workshops, public hearings and other functions as required. Performs related work as required.

**DESIRABLE QUALIFICATIONS**

**Knowledge, Abilities and Skills**

- Considerable knowledge of planning, design, construction, operations and maintenance principals and practices in the areas of roadways, stormwater, and other capital improvement projects. Considerable knowledge of local, state, and federal regulations regarding stormwater issues. Ability to establish and maintain effective working relationships as necessitated by the work. Ability to express oneself clearly and concisely, orally and in writing. Ability to work with citizens, neighborhoods, and internal and external agencies to develop broad based project consensus. Skills in public deliberations and capital projects planning and design. Skill in the use of microcomputers and the associated programs and applications necessary for successful job performance. Possesses management style and values that are consistent with the City of Tallahassee’s mission and values.

**Minimum Training and Experience**

- Possession of a Bachelor’s degree in civil engineering or a related field and five years of professional and administrative experience that includes project planning, development and/or design; or an
equivalent combination of training and experience. Two years of the required experience must have been in a supervisory capacity.

**Necessary Special Requirements**
Must possess registration as a professional engineer at the time of appointment. Must obtain registration as a professional engineer in the State of Florida within one year from date of appointment, as a condition of continued employment.

Must possess a valid class E State driver’s license.
